Green Procurement Guidelines

NIPPON SEIKI CO.,LTD.

April, 2024

13th Edition

Table of Content

1. Introduction p.2
2. Purpose p.3
3. Scope of Application p.3
4. Definitions p.3
5. Requirements to Suppliers p.6
6. Compliance with Regulations of Environmentally Hazardous Substances <u>p.10</u>
7. Procurement Contract Procedures <u>p.14</u>
8. Revision History <u>p.15</u>

1. Introduction

We appreciate for your continuous support and cooperation in our business activities.

Global environmental issues, such as global warming, resource depletion and ecosystem deterioration, have been some growing concerns involving the whole world.

We, NIPPON SEIKI Group ("NS Group" hereinafter), acknowledge global environmental issues as one of the key issues of management, and we promote activities to realize a sustainable society harmonized with environment.

Our products consist of parts, raw materials, and secondary materials delivered from suppliers. Therefore, cooperative efforts and management among suppliers and supply chain are essential to satisfy customer's requirements and to contribute to a sustainable society.

Recent regulations, as typified by EU RoHS Directive or EU REACH Regulations, restrict globally, not only locally, the usage of chemical substances.

As global manufacturing and global procurement increase, the scope of management and observation widens, and consequences of derogation of corporate social responsibility are severe.

In view of these changes, "NS Green Procurement Guidelines" is revised and updated.

The new "NS Green Procurement Guidelines" includes clarified scope of applications, and additions of requirements to reduce greenhouse gas emissions, to work on conservation of biodiversity, and other requirements necessary for sustainable growth of NS and our suppliers.

We appreciate your understandings and request your cooperation in data disclosure as necessary.

Green procurement activities can only be promoted with suppliers' understandings to this "NS Green Procurement Guidelines".

NS will enhance partnerships with suppliers complying with these guidelines to work together on environmental issues.

Chief of Sourcing Headquarters
Operating Officer

Shinobu Sekiguchi

Environment Management Supervisor
Senior Operating Officer

Tatsuo Kase

2. Purpose

NS is promoting activities to achieve environment-friendly product and manufacturing over the entire life cycle in every business field. To "procure environment-friendly products from suppliers promoting environmental business activities" and "manage necessary chemical substance data to be communicated within the supply chain or with customers", we have clarified our requirements in this "NS Green Procurement Guidelines".

3. Scope of Application

These guidelines (13th Edition) are effective from April 1st, 2024.

These guidelines are applied to the following products which are procured by NS Group and contained in our products.

- | | | |
|-------------------------|---|---|
| 1) Material | : | Resin pellet, Paint, Printing ink, Minerals, etc. |
| 2) Product, Part | : | Electronic parts, Mechanical parts, screw, etc. |
| 3) Secondary Material*1 | : | Solder, Adhesive agent, Stamping ink, etc. |
| 4) Packaging Material*2 | : | Card box, Plastic bag, Cushioning, Label, etc. |

The above 1) to 4) are hereinafter called "products".

*1: Secondary Material: All materials which are included in the final product delivered to NS Group, or used in the product manufacturing process, but not included in the final product delivered to NS Group.

*2: Packaging Material: All materials used for wrapping, protecting and shipping of products delivered to NS Group. Packaging materials, such as trays, cushioning, cartons, and returnable boxes, disposed by NS or at logistics sites, or returned to suppliers are exempted from this application.

4. Definitions

EU RoHS Directive: The Restriction of the Hazardous Substances

EU legislation restricting the use of hazardous substances in electrical and electronic equipment. As for environmentally hazardous substances, the use of ten (10) substances are restricted; lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB), Polybrominated diphenyl ethers (PBDE), Bis (2-ethylhexyl) phthalate (DEHP), Butyl benzyl phthalate (BBP), Dibutyl phthalate (DBP), Diisobutyl phthalate (DIBP)

<ref: EU RoHS Directive>

https://ec.europa.eu/environment/topics/waste-and-recycling/rohs-directive_en

EU ELV Directive: End of Life Vehicles

EU legislation of vehicle recycling and environmentally hazardous substances.

As for environmentally hazardous substances, the use of four (4) heavy metals are restricted; lead, mercury, cadmium, and hexavalent chromium.

<ref: EU ELV Directive and Annex II (Exemption List)>

https://ec.europa.eu/environment/topics/waste-and-recycling/end-life-vehicles_en

EU REACH Regulation : Registration, Evaluation, Authorization and Restriction of Chemicals

EU legislation of registration, evaluation, authorization and restriction of chemical substances.

To comply with the regulation, companies must register and manage the risks of the chemical substances they manufacture and market in the EU.

Chemical Substances of Very High Concern (SVHC) may be used only with authorization.

Manufacturing, importing and use of unauthorized substances are restricted.

<ref: REACH by ECHA (EUROPEAN CHEMICALS AGENCY)>

https://ec.europa.eu/environment/chemicals/reach/reach_en.htm

Details of regulated substances --> <https://echa.europa.eu/information-on-chemicals>

SVHC : Substances of Very High Concern

Substances of Very High Concern defined in EU REACH Regulation.

<ref: Candidate List by ECHA>

<https://echa.europa.eu/web/guest/candidate-list-table>

SCIP: Abbreviation for Substances of Concern In article as such or in complex object (Products)

A database for registering SVHC content information developed by the European Chemicals Agency (ECHA). For products and parts marketed in Europe after January 5, 2021, if the SVHC concentration exceeds 0.1 wt%, it's obligatory to register and provide SVHC content information.

EU Packaging Directive(Directive 94/62/EC):

European Parliament and Council Directive on packaging and packaging waste.

<Ref: EU Packaging Directive>

<https://ec.europa.eu/environment/topics/waste-and-recycling/packaging-waste>

GADSL : Global Automotive Declarable Substance List.

A harmonized chemical substances management list prepared by Global Automotive Stakeholders Group (GASG), a global team from the automotive, automotive parts supplier (tier supplier) and chemical/ plastics industries.

<Ref: GADSL>

<https://www.gadsl.org/>

POPs Convention :The Stockholm Convention on Persistent Organic Pollutants

Persistent organic pollutants (POPs), which are highly toxic to humans and organisms and are concerned about long-distance mobility, are persistent in the environment, bioaccumulative.

This treaty stipulates proper disposal of waste containing these substances and manufacturing the elimination / restriction of and use and reduction of emissions.

Toxic Substances Control Act CFR Title 15 Chapter 53

The US Hazardous Substances Control Act was enacted in 1976 by the US Environmental Protection Agency (EPA).

It is regulations on "chemicals, mixtures or articles containing chemicals, mixtures" manufactured, processed or imported for commercial use in the United States.

China VOC regulation: Abbreviation for Volatile Organic Compounds

Seven national compulsory standards (GB standards) that limit VOCs (volatile organic compounds) contained in paints, adhesives, inks, and cleaning agents issued by the China National Standardization Commission on March 4, 2020.

GHG : Greenhouse Gas

Gas in an atmosphere that absorbs and emits radiation within the thermal infrared range, which cause the greenhouse effect.

NS targets the following six types of gasses.

• CO₂ (carbon dioxide), CH₄ (methane), N₂O (nitrous oxide), HFC (hydrofluorocarbon), PFC (Perfluorocarbon), SF₆ (sulfur hexafluoride)

EMS : Environmental Management System

It refers to the organization's plans, systems, processes, etc. for the organization to set environmental policies, objectives, goals, etc., and implement efforts to achieve them.

CMS : Chemical substances Management System

A system that manages environmentally hazardous substances contained in products.

Prohibited Substances:

Substances which use or use exceeding the restricted amount in the product are prohibited by regulations and relevant guidelines of Japan and other countries.

Management Required Substances:

Substances of which inclusion, amount, including part, purpose, and etc. need to be managed.

Homogeneous Material:

Defined by EU RoHS Directive and EU ELV Directive.

Means a material that cannot be disjointed or separated into different materials by mechanical actions.

Self-diagnosis Sheet:

JAMA · JAPIA chemical substances management guideline Annex A

Replaced the CMS item part of the "EMS/CMS self-checklist" of the document in the past with a self-diagnosis sheet.

JAPIA LCI Calculation Tool(Production phase):

LCI calculation tool(Production phase) based on JAPIA LCI Calculation Guidelines

<https://www.japia.or.jp/work/kankyou/lciguide/>

(Equivalent to calculation tools of Category 1 in the upstream of GHG protocol scope 3)

5. Requirements to Suppliers

Green Procurement Requirements List

Documents to be Submitted	What to Submit	When to Submit					Remarks
		At Start of Procurement	Periodic survey (once a year)	At Planning for New Items	At Any Changes	At Request (Changes in)	
(1) Establishment of Environment Management System (EMS)	"Green Procurement" Self-Evaluation Sheet	<input type="radio"/>					
	"EMS" Self Check List Self-diagnosis Sheet	<input type="radio"/>	<input type="radio"/>				
	Quality (Environment) Assessment Sheet	<input type="radio"/> *1)					*1) Checked when NS visits or online for assessment as necessary.
(2) Establishment of Chemical Substance Management System (CMS)	"Green Procurement" Self-Evaluation Sheet	<input type="radio"/>					
	"EMS" Self Check List Self-diagnosis Sheet	<input type="radio"/>	<input type="radio"/>				
	Quality (Environment) Assessment Sheet	<input type="radio"/>			<input type="radio"/> *2)		*2) Checked when NS visits or online for assessment as necessary.
	Declaration of Non-Use of RoHS Restricted Substances	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/> *3)	<input type="radio"/>	*3) Resubmit after verifying when stated content is changed due to relocation of production site, etc.
	Chemical substance survey forms			<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	When there is change in the content.
	Pre-IPP Application				<input type="radio"/>		Submit 6 months prior.
	Product Specifications			<input type="radio"/>	<input type="radio"/>		When there is change in specs.
Parts Inspection Report			<input type="radio"/>	<input type="radio"/>		When there is change in report. (Depends on the changes)	
(3) Reduction of environmental impact · Grasp / reduce GHG emissions · Promotion of Resources Recycling · Conservation of Biodiversity	"EMS" Self Check List Self-diagnosis Sheet	<input type="radio"/>					
	"EMS·CMS" Self Check List	<input type="radio"/>	<input type="radio"/>				
	GHG survey sheet		<input type="radio"/>				

(1) Establishment of Environment Management System

For establishing and maintaining Environment Management System, please acquire ISO 14001 or certification from external authority complying with ISO 14001.

For suppliers not certified, establishment of an environment management system equivalent to ISO 14001 is requested. Progress of establishment shall be confirmed in "Green Procurement" Self-Evaluation Sheet and EMS Self Check List , Self-diagnosis Sheet.

(2) Establishment of Chemical substances Management System (CMS)

Suppliers delivering products to NS are requested to establish CMS.

Management of specified chemical substances contained in products are required under laws and regulations of Japan and other countries. To satisfy these requirements, each company is required to manage the chemical substances contained in products with "appropriate and effective" means through the supply chain. Progress of establishment shall be confirmed in "Green Procurement" Self-Evaluation Sheet and EMS Self Check List , Self-diagnosis Sheet.

① Requirements to Suppliers regarding CMS

No.	Requirements	Summary
1	Policy	Declare policy of actions by managements.
2	Define Management Criteria	Define management procedures to satisfy laws/ regulations, industrial voluntary standards, and customer requirements.
3	Define Scope of Management	Define "product", "process", "constituent materials", "chemical substances" to be managed.
4	Set Targets and Plan Implementation Process	Define and revise targets and plans.
5	Define Organizational System, Responsibility and Authority	Define roles and responsibility of depts. engaged in management.
6	Design/ Development	Confirm compliance with requirements in design / development process.
7	Collect and Confirm Chemical Substance Data included in Products	Systematize collection and confirmation of data from supplier.
8	Sourcing Management	Communicating requirements with suppliers.
9	Acceptance Verification	Confirm conformity with company criteria when accepting purchased materials.
10	Process Control	Define management items of process where chemical substance amount changes. Identification control and prevention (erroneous use, mixing and contamination) , etc.
11	Shipping Verification	Confirm compliance with company criteria when shipping.
12	Traceability	Define product traceability.
13	Change Control	Define process when changes in chemical substance management has occurred. (e.g. design, process, supplier)
14	Process for Non-Conformity	Define process when non-conforming product is found.
15	Training	Define details of training.
16	Documentation and Control	Define procedures of keeping documents and records.
17	Communication	Establish system for sharing information.
18	Performance Evaluation and Improvement	Evaluation and improvement of the management by internal audit.
19	Management Review	Improvement of issues by managements.

② Consistent Management of Chemical Substances

Suppliers are required to consistently manage that the delivered products do not include prohibited substances, or the restricted substances included are within the threshold value.

⇒page 7, 6. Please observe the requirement.

※ Some prohibited substances were used for various applications in the past as additive agents to achieve product performance characteristics. These might even be included in current products.

Various cases of erroneous use, mixing, and contamination of prohibited substances have been reported, including those usually contained in raw materials in nature, remaining in products after generation as by-products or used as subsidiary materials in the manufacturing process, being mixed into products due to shared production lines or the use of alternative materials available in inventory.

Suppliers are requested to properly control prohibited materials in order to prevent their mixture into products in excess of the threshold value by understanding their characteristics and tracking their history, including those exempt from laws and regulations.

(3) Reduction of environmental impact

① Grasp / reduce GHG emissions

- NS Group are promoting activities to reduce GHG emissions by 50% by 2030 from 2019 levels toward carbon neutrality by 2050 as a countermeasure against global warming.
- Suppliers are requested to know and to reduce the amount of Greenhouse Gas emissions.
- Actions are taken to establish system to know and to reduce the amount of GHG emissions and energy consumption.

⇒ Please submit the investigation sheet of page 8, 6 (2) ④.

② Promotion of Resources Recycling

a) Suppliers are requested to propose and use materials that contribute to recycling-oriented manufacturing. NS promotes effective utilization of resources. "Materials that contribute to recycling-oriented manufacturing" means;

- Materials which contribute to reduce necessary resources for manufacturing.
- Materials which contribute to enhance utilization of recycled resources.
- Materials which contribute to reuse packaging materials for shipping.

b) Reduction of waste discharge and promotion of recycling

c) Biodiversity Conservation

• We ask our business partners to contribute to biodiversity conservation by understanding the importance of biodiversity and taking measures to protect ecosystems and biodiversity.

(4) Management of environmentally hazardous substances at upstream business partners

- Please communicate the request of this guideline to the upstream business partner of the business partner and also manage and supervise it.

(5) Resolving Human Rights Issues

NS Group has established "NS Group Human Rights Policy" at the Management Conference in February 2023.

We recognize that respect for human rights is essential to the realization of a sustainable society. The Human Rights Policy identifies the following items as key issues, and we ask our suppliers, including upstream business partners, to understand the policy and act to resolve these issues.

- | | |
|---|---|
| • Prohibition of forced labor and child labor | • Prohibition of discrimination and harassment |
| • Respect and acceptance of diversity | • Prohibition of underpayment and nonpayment of wages |
| • Prohibition of excessive labor | • Compliance with occupational health and safety |
| • Rights of migrant and foreign workers | • Rights of indigenous and local residents |
| • Freedom of association | • Right to privacy, Freedom of expression |
| • Prohibition of bribery and illegal profit-sharing | |

Human Rights Policy : https://www.nippon-seiki.co.jp/global/corp_policy/#contents06

Key Issues : https://www.nippon-seiki.co.jp/global/sustaina_qs/#contents04

(6)Responsible Mineral Procurement

Conflict minerals (Tin, tantalum, tungsten, gold, etc.) originating in conflict areas and high-risk areas (CAHARAs) are at risk of supporting armed groups, human rights violations such as child labour, bribery, money laundering, tax evasion and environmental damage (OECD Annex II risks). In our group, the CMRT provided by RMI has been used to conduct surveys to make supply chains more transparent and reduce risks. We ask our suppliers to cooperate with the survey.

When suppliers identify risks in the supply chain, you ask them to respond in accordance with your due diligence policies. (*)

Examples of risks: smelters originating in conflict or high-risk areas are not certified.

Examples of responses: encouraging smelters to be certified or removing at-risk smelters from the supply chain.

*Reference:

OECD Due Diligence Guidance for Responsible Business Conduct

<https://www.oecd.org/investment/ue-diligence-guidance-for-responsible-business-conduct.htm>

OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas

<https://www.oecd.org/daf/inv/mne/mining.htm>

(7)Supplier Sustainability Guidelines

In all aspects of sustainability, we have compiled and published the Supplier Sustainability Guidelines on safety, quality, human rights, labor, environment, responsible mineral procurement, compliance, and information disclosure.

We appreciate your understanding and cooperation while reviewing the contents of these guidelines.

Supplier Sustainability Guidelines

https://www.nippon-seiki.co.jp/sustaina_en/#contents03

6. Compliance with Regulations of Environmentally Hazardous Substances

All products delivered to NS shall comply with various regulations related to environmentally hazardous substances. Requirements are specified as the following.

We appreciate your cooperation for providing us information.

(1) Management of Environmentally Hazardous Substances

① EU RoHS Directive

Please refer to Annex III on the following site for exemptions.

<https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:02011L0065-20210401&from=EN>

The transition to new system about NS part number was carried out in August, 2021.

Parts with digit 11 "M" assigned in the new parts number system must comply with the European RoHS Directive in principle, except for the following:

If non-compliant part occurs, please ask to NS Design Dept.

If the part is not compliant due to reviewing the exemption application,

Only the case that there is no replacement at 6 months before its sunset date and NS Design Dept. permits.

② EU ELV Directive

Please refer to the latest Annex II such as the following site for exemptions.

<https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:02000L0053-20200306&from=EN>

③ EU REACH Regulation

Please confirm the Candidate List and inform us when any SVHC is included in the product.

For products marketed in the EU, registration of SCIP information is obligatory, so please list all SVHC substances.

<https://echa.europa.eu/candidate-list-table>

In addition, confirm the Authorization List, and in principle substances to be posted will be prohibited substances of NS and prohibited to be used / included in future products.

<https://echa.europa.eu/authorisation-list>

Moreover, confirm the Substances restricted under REACH and substances to be posted (Entry No. 1~78) will be prohibited to be used for the restricted application.

<https://echa.europa.eu/substances-restricted-under-reach>

Communication of REACH SVHC in automotive industry is based on "AUTOMOTIVE INDUSTRY GUIDELINE ON REACH ver. 4.1"

<https://www.acea.be/industry-topics/tag/category/reach>

④ GADSL

Please check GADSL (substance management list for automotive industry) and declare all containing substances listed on it.

Even though it was not necessary to declare substances because it was not regulated in GADSL, if the contained substance is regulated in the latest GADSL because it is newly added or its threshold is changed, its supplier shall resubmit the datasheet as soon as possible.

Moreover, no prohibited substance over the threshold shall be contained in NS parts.

GADSL will be updated and published not only annually in February but also occasionally, so please check the latest GADSL always.

<https://www.gadsl.org/>

⑤ EU Packaging Directive:

Content of four heavy metals (lead, cadmium, mercury, and hexavalent chromium) in total with the mass of materials constructing the packaging must be less than 100ppm by weight.

Materials constructing the packaging are parts which can be easily separated (e.g. "corrugated board" used for packing the product, "adhesive tape" used for assembly in a corrugated box package, and "label" used for indication are to be considered as separate materials)

https://ec.europa.eu/environment/topics/waste-and-recycling/packaging-waste_en

⑥ Chinese VOC regulations

Please refer to the following site for 7 GB standards.

<https://j-net21.smrj.go.jp/qa/development/Q1390.html>

⑦ POPs Convention

Annex A (Abolition) / Annex B (Restrictions) Listed Substances and Proposed Substances

In principle, these are prohibited to use or contain in future products.

In addition, please comply with the POPs Treaty Collateral Law in each country and region (e.g., the Nationalization Law and EU POPs).

⑧ Compliance with US TSCA PBT 5 substances

In principle, these 5 substances of PBT (persistent, bioaccumulative, toxic) specified by Article 6 of the US TSCA are prohibited to use or contain in future products.

⑨ Compliance with France Arrete 2022/4/13

In principle, MOSH, MOAH are prohibited to use or contain in future products.

⑩ Canadian Rules for the Prohibition of Specified Hazardous Substances

As a general rule, we will prohibit the use and inclusion in future products as a prohibited substance in our company.

(2) Submission of Environmental Data

【At the start of trading, Periodic survey (once a year)】

① "Green Procurement" Self-Evaluation Sheet

Suppliers should evaluate and submit the environmental management system at the start of trading
Available at the following web site.

Form found at: https://www.nippon-seiki.co.jp/sustaina_en/#contents04

② EMS Self Check List and Self-diagnosis Sheet.

Suppliers self-evaluate the establishment progress of EMS and CMS and submit it.
Available at the following web site.

Form found at: https://www.nippon-seiki.co.jp/sustaina_en/#contents04

- ③ Declaration of Non-Use of RoHS Restricted Substances
 Suppliers should survey the inclusion status of RoHS regulated substances and submit it.
 Trading companies shall request manufacturers to restrict usage of RoHS restricted substances.
 "Declaration of Non-Use of RoHS Restricted Substances" shall be submitted within ten (10) business days when requested.
 The guaranteed value is a guarantee that is less than the regulation value, and it is not a guarantee below the control value.
 Form found at: https://www.nippon-seiki.co.jp/sustaina_en/#contents04

- ④ GHG survey Sheet and the result of LCI calculation tool(Production phase)
 When requested, please provide us GHG data related to products delivered to NS, using the specified form for survey.

[Occasional (non-periodic) survey]

Suppliers are asked to submit Chemical substance survey forms for newly supplying products.

Chemical substance survey forms (◎ : Mandatory , — : Only upon request)

Survey Form	For Autom otive	For Consu mer	Type of Item Delivered				Submit to
			Raw Materials	Products, Parts	Secondary Materials	Packaging	
⑤ Precision Analysis Data of RoHS Restricted Substances	—	○	◎	◎	◎	◎	Requested Dept.
⑥ SDS	○	○	◎	—	◎	—	↑
⑦ chemSHERPA(Jul.2018~)	—	○	—	◎	◎	◎	↑
⑧ JAMA/JAPIA Standard Material Datasheet or ◎IMDS(*)	○	—	◎	◎	◎	—	↑
⑨ IMDS	○	—	◎	◎	◎	—	↑

* We would like you to submit the JAPIA unified data sheet as much as possible.

※NS is JAPIA member, however, we manufacture not only for automotive and also for consumer,so we also need to respond customers' requests specialized for consumer products.

Please submit via the required survey format.

- ⑤ Precision Analysis Data of RoHS Restricted Substances
 Please complete the form found at: https://www.nippon-seiki.co.jp/sustaina_en/#contents04
 Precision analysis data such as ICP data certifying the non-use of the ten (10) substances restricted by EU RoHS Directive shall be submitted for each homogeneous material.
 Please use the provided form.
- ⑥ SDS
 Please provide us the data referring to the following website.
 ref.: Ministry of Economy, Trade and Industry
https://www.meti.go.jp/policy/chemical_management/law/msds/4.html

⑦ chemSHERPA

A new information transfer scheme was released by The Ministry of Economy, Trade and Industry in October, 2015.

It will be revised about twice a year, so please pay attention to it and make sure that there are no omissions in the report.

You can download it from the following web site.

<https://chemsherpa.net/chemSHERPA/tool/>

⑧ JAPIA Standard Material Datasheet

A standardized constituent investigation sheet prepared by JAPIA (Japan Auto Parts Industries Association)

Available at the following web site:

<https://www.japia.or.jp/en/top/>

Please contact us for the password.

⑨ IMDS

A collective material data system for environmentally hazardous substances used by automotive industry.

<https://www.mdsystem.com/>

Please submit data to 18363 (IMDS COMPANY ID of NS)

Each investigation form or data shall be resubmitted as soon as possible if any change occurs due to following;

- occurring a change at initial product application,
- adding declarable substances because of regulating newly or changing the threshold,
- changing exemption application in the applicable regulation.
- occurring a change point including additives (plasticizer, flame retardant, pigment, etc.) in the material change.

Specific investigation sheet/form may be required upon some customer specific requirements on chemical substance management.

Compliance to these requirements are also necessary.

7. Procurement Contract Procedures

Based on provided documentations, suppliers' business activities and products will be evaluated for its conformity with NS Green Procurement Guidelines.

With the evaluation result, NS procures materials satisfying NS Green Procurement Guidelines from suppliers satisfying NS Green Procurement Guidelines.

Suppliers are requested for improvement measures against any unsatisfactory results found in self-evaluation. We may visit suppliers for auditing to have better understanding of actual situation. Suppliers are also requested for supervising Tier 2, Tier 3, etc. suppliers. We appreciate your cooperation.

8. Revision History

Edition No.	Date	Changes
1st	July 26th, 2005	Establish
2nd	February 1st, 2010	Fully Revised and Updated
3rd	March 15th, 2013	Fully Revised and Updated
